StudiumPlus
Dual Study
Programs at THM

Introducing StudiumPlus

StudiumPlus offers unique and innovative dual study programs in close cooperation with more than 550 partner companies. StudiumPlus students are nominated and employed by companies for their entire study program (both Bachelor and Master). They work full time in their respective company during semester breaks and project semesters, as well as for final projects, whereas during lecture periods they follow full time studies on campus.

The intensive, practical study programs bring first-class academic education close to students and companies in Wetzlar and in our four local branch campuses all over Hesse. The close contact between professors, lecturers, advisors from industry and students is fostered intensely.

The Benefits of StudiumPlus

Advantages for Students

- High-grade innovative study programs
- Comprehensive work-study programs
- Small groups and individual supervision by mentors and tutors
- Adequate monthly salary
- Excellent career prospects

Advantages for Companies

- Instrument of staff development
- Permanent interaction between theory and practice
- No training on the job for graduates
- Demand-oriented study programs
- Students will be attached to the company
- Knowledge transfer and research projects
- Academic education in close proximity to the companies

Structure of the Dual Study Programs at StudiumPlus

Dual Bachelor's Degrees

The dual Bachelor's degrees require 6 semesters of study. In principle, theory (during the lecture periods) and practice (during the semester breaks) take place alternately.

University	Company
	Preliminary practice in the company
1. semester	
	1. internship
2. semester	
	2. internship
3. semester	
	3. internship
4. semester	
	traineeship
5. semester	
	bachelor thesis
6. semester	

Dual Master's Degrees

Within the 2-year dual Master programs the lecture periods are organized in three-day bloc courses, which mostly take place twice a month from Thursday to Saturday. Students work on their first project during the first semester, the second project phase covers the second and third semester. In the course of the last, the fourth semester students write their Master's thesis, while they attend specialist modules.

Interdisciplinary Competences

Today interdisciplinary skills and competences are important qualifications for starting a career. In addition to specialist knowledge StudiumPlus intentionally includes essential skills as how to communicate successfully, how to motivate people and work effectively into the curricula:

- Leadership Skills and Social Skills
 - Working Methods
 - Creativity Techniques
 - Moderation
 - Motivation
 - Presentation Techniques
 - Time Management
- IT Competences
- Business English / Technical English
- Project Management
- Business Ethics and Discussion with Regional Entrepreneurs
- Etiquette
